Module 2 Answer

1. For certain services like Amazon Elastic Compute Cloud (Amazon EC2) and Amazon Relational Database Service (Amazon RDS), you can invest in reserved capacity. What options are available for Reserved Instances? (Choose three.)

   - ☑ AURI
   - ☐ MURI
   - ☑ NURI
   - ☑ PURI
   - ☐ DURI

2. Where can a customer go to get more details about Amazon Elastic Compute Cloud (Amazon EC2) billing activity that took place 3 months ago? (Select the best answer.)

   - ○ Amazon EC2 dashboard
   - ◉ AWS Cost Explorer
   - ○ AWS Trusted Advisor dashboard
   - ○ AWS CloudTrail logs stored in Amazon Simple Storage Service (Amazon S3)

Correct

AWS Cost Explorer can give you more details about Amazon EC2 billing activity for the past 3 months.

Continue

3. True or false? To receive the discounted rate associated with Reserved Instances, you must make a full, upfront payment for the term of the agreement. (Select the best answer.)

○ True

⦿ False

Correct

To receive the discounted rate associated with Reserved Instances, you do not need to make a full, upfront payment.
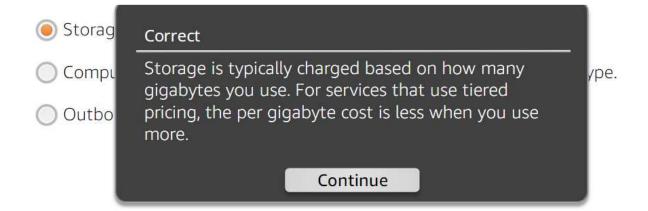

Continue

4. Which statement is true about the pricing model on AWS? (Select the best answer.)

○ In most cases, there is a per gigabyte charge for inbound data transfer.
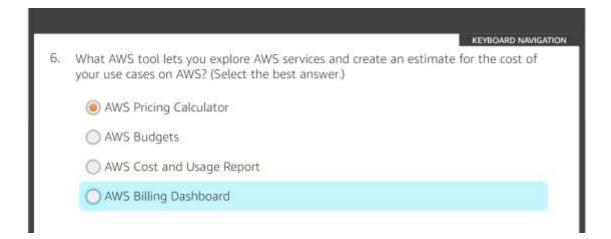

⦿ Storage is typically charged per gigabyte.

○ Compute is typically charged as a monthly fee based on instance type.

○ Outbound charges are free up to a per account limit.

○ Storag

○ Compu

○ Outbo

Correct

Storage is typically charged based on how many gigabytes you use. For services that use tiered pricing, the per gigabyte cost is less when you use more.

Continue

5. What are the four support plans offered by AWS Support? (Select the best answer.)

○ Basic, Developer, Business, Enterprise

○ Basic, Startup, Business, Enterprise

○ Free, Bronze, Silver, Gold

○ All support is free

asic,

ee, B

l sup

Correct

The four support plans offered by AWS Support are Basic, Developer, Business, and Enterprise.

Continue

6. What AWS tool lets you explore AWS services and create an estimate for the cost of your use cases on AWS? (Select the best answer.)

- ◉ AWS Pricing Calculator
- ◯ AWS Budgets
- ◯ AWS Cost and Usage Report
- ◯ AWS Billing Dashboard

Correct

The AWS Pricing Calculator lets you model your solutions before building them, explore the price points and calculations behind your estimate, and find the available instance types and contract terms that meet your needs.
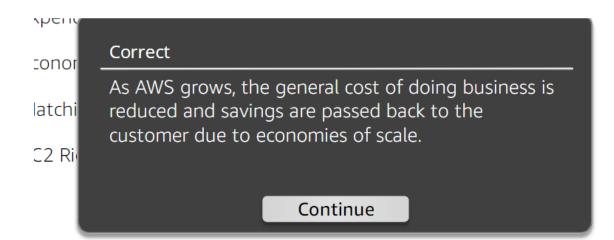

Continue

7. As AWS grows, the cost of doing business is reduced and savings are passed back to the customer with lower pricing. What is this optimization called? (Select the best answer.)

- ◯ Expenditure awareness
- ◉ Economies of scale
- ◯ Matching supply and demand
- ◯ EC2 Right Sizing

Correct

As AWS grows, the general cost of doing business is reduced and savings are passed back to the customer due to economies of scale.

8. True or false? AWS offers some services at no charge, such as, Amazon Virtual Private Cloud, AWS Identity and Access Management, Consolidated Billing, AWS Elastic Beanstalk, automatic scaling, AWS OpsWorks and AWS CloudFormation. However, you might be charged for other AWS services that you use in conjunction with these services.
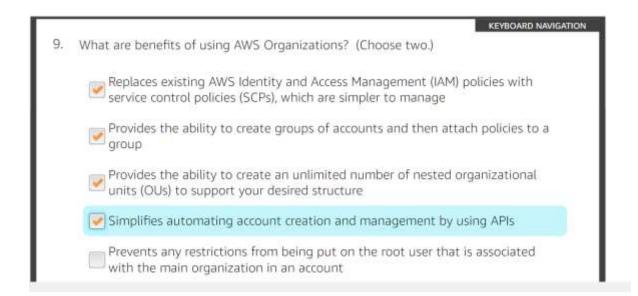

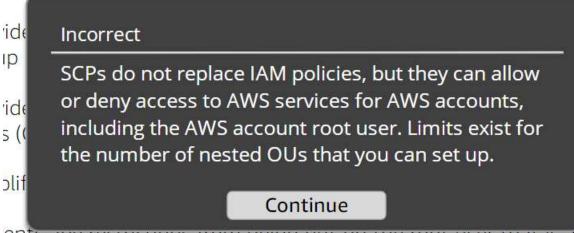

- ⦿ True
- ○ False

Correct

AWS offers these services at no charge, though you might be charged for other AWS services that you use in conjunction with these services.
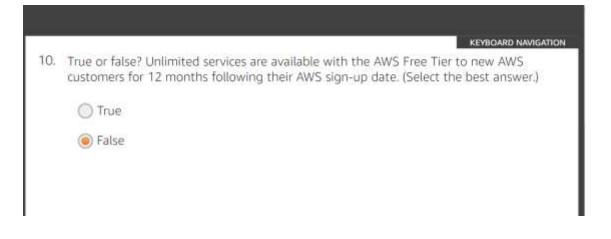

Continue

9. What are benefits of using AWS Organizations? (Choose two.)

☑ Replaces existing AWS Identity and Access Management (IAM) policies with service control policies (SCPs), which are simpler to manage

☑ Provides the ability to create groups of accounts and then attach policies to a group

☑ Provides the ability to create an unlimited number of nested organizational units (OUs) to support your desired structure

☑ Simplifies automating account creation and management by using APIs

☐ Prevents any restrictions from being put on the root user that is associated with the main organization in an account

Incorrect

SCPs do not replace IAM policies, but they can allow or deny access to AWS services for AWS accounts, including the AWS account root user. Limits exist for the number of nested OUs that you can set up.
